

Lighting installation and maintenance

Ocean II

Thank you for purchasing our products.
Be sure to keep this instruction manual

Please read this manual carefully before operation

This manual cannot provide all the details about the lighting fixtures or possible differences with the actual product, as well as all possible unexpected situations related to installation, use and maintenance. For more details or if special problems other than those listed in this manual occur, please contact our company.

! WARNING

Beware of electric shock/beware of burns/install correctly

- Please install strictly according to the instructions.
Improper installation may cause accidents such as falling, electric shock, fire, etc.
- Please do not modify the lamps or replace parts at will.
Avoid accidents such as lamps falling, electric shock, fire, etc.
- To ensure safety, be sure to connect the ground wire before connecting the power cord.
- Do not use in places where corrosive gas and oil pollution may occur.
Avoid accidents such as falling, electric shock, fire, etc.

Precautions before wiring

Electrical parameter requirements
Please be sure to connect to the mains power supply that complies with the requirements of the lamp parameter label

Grounding requirements:
This lamp needs to be grounded. Please ground it reliably according to the standards of the country where it is located

Install

Preparation before installation

- Before installation, be sure to cut off the power supply to prevent electric shock.
- Please determine the installation hole distance according to the installation dimensions in Figure 1 and confirm the strength of the screw hanging position to ensure that it can bear the weight of the lamp.
- ※ If the strength is not enough, it is easy to cause accidents such as lamp falling.
- As shown in the right figure, the necessary installation distance must be reserved between the ceiling and the main body of the lamp to avoid interference during installation.

Install the main body of the lamp

- ※ Since the lamp is heavy, it is recommended that two people install it.
- Use the hanging screw to install the lamp (the hanging screw is purchased separately by the customer, specification M10).
One person holds the lamp with both hands, and the other person puts the washer and nut on the hanging rod, then passes the hanging screw through the mounting hole of the mounting bracket, and fixes the lamp with the washer and nut, as shown in the figure on the right.
- After fixing the lamp with the hanging screw, the exposed part of the screw should not be too long to avoid interference when installing the lamp.
- ※ Tighten the nut with a wrench to avoid accidents such as the lamp falling due to improper installation.
- ※ Please make sure the lamp remains level during installation.

WARNING, ELECTRIC SHOCK HAZARD

Lighting installation and maintenance

Ocean II

Connect the power cord

- Use an external power cord with a diameter of 6mm-7mm.
- Open the power cover before connecting the power cord as shown below.
- To ensure safety, be sure to connect the ground wire before connecting the external power cord.
- The external power cord should be inserted from the wiring hole on the side of the cover.
- Align the external power cord with the L, N, and ground wire of the lamp input wire.
Do not connect them wrongly.
- After the external power cord and the lamp input wire are connected, take insulation measures to avoid accidents such as electric shock and fire.
- After wiring is completed, reinstall the cover and lock it.

Installation Completed

After completing the above steps, the lamp will look like the following figure, and the installation is complete

Note:

- ※ The style and color of the lamp are subject to the actual product.
- ※ Subject to change without prior notice.

Lighting maintenance

- In order to use this product safely and efficiently, please clean and inspect it regularly (once every 6 months). If it is not inspected, long-term use may cause accidents such as fire, electric shock, and lamp falling.
- When the lamp needs to be cleaned, please use a soft cloth dipped in neutral detergent and wring it out, then wipe it with a dry cloth. Do not use detergents or organic solvents other than neutral detergents to wipe the lamp to avoid problems such as discoloration, deterioration, reduced strength or damage to the lamp.
- Please do not spray insecticide on the lamp, otherwise it will cause discoloration or damage to the lamp.
