

Lighting installation and maintenance

Hermes

Thank you for purchasing our products.
Be sure to keep this instruction manual

Please read this manual carefully before operation

This manual cannot provide all the details about the lighting fixtures or possible differences with the actual product, as well as all possible unexpected situations related to installation, use and maintenance. For more details or if special problems other than those listed in this manual occur, please contact our company.

! WARNING

Beware of electric shock/beware of burns/install correctly

- Please install strictly according to the instructions.
Improper installation may cause accidents such as falling, electric shock, fire, etc.
- Please do not modify the lamps or replace parts at will.
Avoid accidents such as lamps falling, electric shock, fire, etc.
- To ensure safety, be sure to connect the ground wire before connecting the power cord.
- Do not use in places where corrosive gas and oil pollution may occur.
Avoid accidents such as falling, electric shock, fire, etc.

Precautions before wiring

Electrical parameter requirements
Please be sure to connect to the mains power supply that complies with the requirements of the lamp parameter label

Grounding requirements:
This lamp needs to be grounded. Please ground it reliably according to the standards of the country where it is located

- The power supply used should not exceed the rated value.

Using the lamp beyond the rated voltage for a long time may cause the lamp to overheat and cause a fire.

- Do not use in places exposed to direct sunlight, humidity, vibration or where corrosive gases are generated. Avoid accidents such as falling, electric shock, fire, rust, etc.

- Do not install on ceilings made of soft materials such as asbestos to avoid damage to the ceiling material or the lamp falling.

- Do not use the product under eaves, in passages outside houses, or in other places where it may be exposed to rain.

Avoid accidents such as fire, electric shock, falling, rust, paint discoloration and peeling.

- To ensure safety, please entrust electrical professionals to repair and inspect lamps. Non-professionals may cause danger.

- If any abnormal phenomenon occurs in the lamp, please cut off the power supply immediately and contact the manufacturer.

- Do not use it with dimming devices such as lighting controllers and brightness adjustment switches to avoid accidents such as fire.

- The light source in this lamp should be replaced by the manufacturer or other service agent or similarly qualified personnel.

Repair and Maintenance

- In order to use this product safely and efficiently, please clean and inspect it regularly (once every 6 months).

If not inspected, long-term use may cause accidents such as fire, electric shock, and lamp falling.

- When the lamp needs to be cleaned, please use a soft cloth dipped in neutral detergent and wring it out, then wipe it with a dry cloth. Do not use any detergent other than neutral detergent.

Do not wipe the lamps with detergents or organic solvents to avoid problems such as discoloration, deterioration, reduced intensity or damage to the lamps.

- Please do not spray insecticide on the lamps, otherwise it may cause discoloration or damage to the lamps.

WARNING, ELECTRIC SHOCK HAZARD

Lighting installation and maintenance

Hermes

! WARNING

- Please cut off the power supply during installation or maintenance
- Improper installation of the lamp may cause the lamp to fall, please follow the instructions
- Do not touch the light source when the lamp is working
- Do not replace any cracked protective cover

Install

Preparation before installation

- Before installation, be sure to cut off the power supply to prevent electric shock.
- Please determine the installation hole distance according to the installation dimensions in Figure 1 and confirm the strength of the screw hanging position to ensure that it can bear the weight of the lamp.
- ※ If the strength is not enough, it is easy to cause accidents such as lamp falling.
- As shown in the right figure, the necessary installation distance must be reserved between the ceiling and the main body of the lamp to avoid interference during installation.

Install the main body of the lamp

- ※ Since the lamp is heavy, it is recommended that two people install it. Install the light fixture with a hanging chain, one person holding the light fixture with both hands, and one person holding it. Hang the suspension chain on the lamp hook, and perform the same operation on the other side, as shown in Figure 2.
- ※ Please make sure the lamp remains level during installation.

Connect the power cord

- To ensure safety, be sure to connect the ground wire before connecting the external power cord.
- The external power cord should be inserted from the wiring hole on the side of the cover.
- Align the external power cord with the L, N, and ground wire of the lamp input wire. Do not connect them wrongly.
- After the external power cord and the lamp input wire are connected, take insulation measures to avoid accidents such as electric shock and fire.

Lighting maintenance

- In order to use this product safely and efficiently, please clean and inspect it regularly (once every 6 months). If it is not inspected, long-term use may cause accidents such as fire, electric shock, and lamp falling.
- When the lamp needs to be cleaned, please use a soft cloth dipped in neutral detergent and wring it out, then wipe it with a dry cloth. Do not use detergents or organic solvents other than neutral detergents to wipe the lamp to avoid problems such as discoloration, deterioration, reduced strength or damage to the lamp.
- Please do not spray insecticide on the lamp, otherwise it will cause discoloration or damage to the lamp.
