- Do not replace any cracked protective cover

I Install

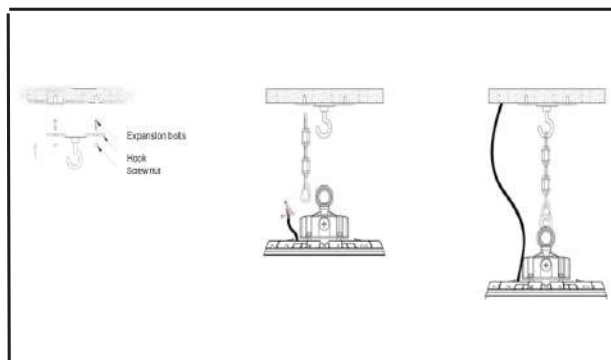

Preparation before installation

- Before installation, be sure to cut off the power supply to prevent electric shock.
- Confirm the size and appearance of the lighting fixtures according to Figure 1
- ※ If the strength is not enough, it is easy to cause accidents such as lighting falling.
- As shown in the right figure, you must keep the required space between the ceiling and the main part of the light. This helps avoid problems during installation.

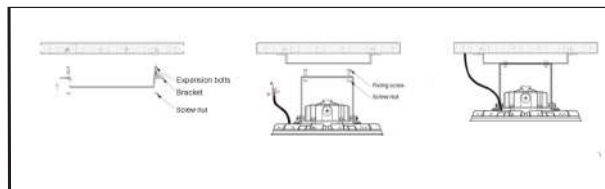

Install the main body of the lighting

Hanging chain Installation

1. Drill corresponding size holes in the ceiling, Put the Expansion bolts into holes, Fixed the hook on the ceiling with nut
2. As Photo 2 showing, Using the chain's buckle button up the fixture's ring.
3. As photo 3 showing, Hanging the chain's another-side ring on the hook with carefully.
4. Notes distinguish the L/N / GND line.

Support installation

1. Drill corresponding size holes in the ceiling, Put the Expansion bolts into holes. fix the bracket to the ceiling with nuts
2. As shown in Figure 2, use fixing screws to fix the lighting and bracket.
3. Notes distinguish the L/N / GND line.

Connect the power cord

- To ensure safety, be sure to connect the ground wire before connecting the external power cord.
- The external power cord should be inserted from the wiring hole on the side of the cover.
- Align the external power cord with the L, N, and ground wire of the lighting input wire. Do not connect them wrongly.
- After the external power cord and the lighting input wire are connected, take insulation measures to avoid accidents such as electric shock and fire.

Lighting maintenance

- To use this product safely and efficiently, please clean and inspect it regularly (once every 6 months). If it is not inspected, long-term use may cause accidents such as fire, electric shock, and lighting falling.
- When the lighting needs to be cleaned, please use a soft cloth dipped in neutral detergent and wring it out, then wipe it with a dry cloth.
- Do not use detergents or organic solvents other than neutral detergents to wipe the lighting to avoid problems such as discoloration, deterioration, reduced strength or damage to the lighting.
- Please do not spray insecticide on the lighting, otherwise it will cause discoloration or damage to the lighting.
